Corporate overview

Our vast experience in the floriculture space has given us a firm footing in our latest venture - Agri business.

After establishing ourselves as exporters of premium roses from Ethiopia to Japan, we have expanded operations cultivating staple crops in a phased manner. We have begun with the farming of rice and pulses in the first phase, with plans of including Sugar cane in the subsequent phases. Our team of eminent scientists and researchers constantly upgrade cultivation methods in order to ensure global best quality agricultural produce.

Our operations in Agriculture, a priority sector, assure current and future investors the best returns in the industry. We remain sensitive towards the needs of the environment, people and communities we live and do business with, following ethical business practices at all times.
